Software House Tools – see www.starmicronics.com/support for SDKs and more

Star's new **CloudPRNT** technology allows remote printing directly and securely from your web server to printers anywhere in the world without complicated network configurations – perfect for restaurant aggregation etc. Just purchase an HI X Printer or upgrade your current Star direct thermal **TSP654II**, **TSP743II**, **TSP847II** or matrix **SP700** and **YOUR** Cloud services will take control.

Star offer **PassPRNT** & **WebPRNT** technologies for integration by the web developer with Star mobile and desktop printers via **Bluetooth**, **LAN/WLAN** or **USB** printer.

This enables direct printing for iOS and Android clients from a compatible web based application with no native app development required.

► Star works with all major tablet POS software solutions, but please check your particular software is supported.
