

Kiosk Solutions

As a leading provider of packaged and modular specialist kiosk printing solutions, Star offers a wide range of industry-leading products. Offering high quality receipt, ticket and label printing solutions from specialised kiosk mechanisms and housed printers, Star solutions are integrated into some of the world's largest kiosk and self-service applications including Government projects, Click & Collect and product returns stations, endless aisle, parking and access control, food ordering and visitor management. From complex integrations to super compact "Next Generation" tablet kiosks, customers can benefit from the renowned reliability and superior features of Star's printer range.

The Star Difference

Technical Innovation

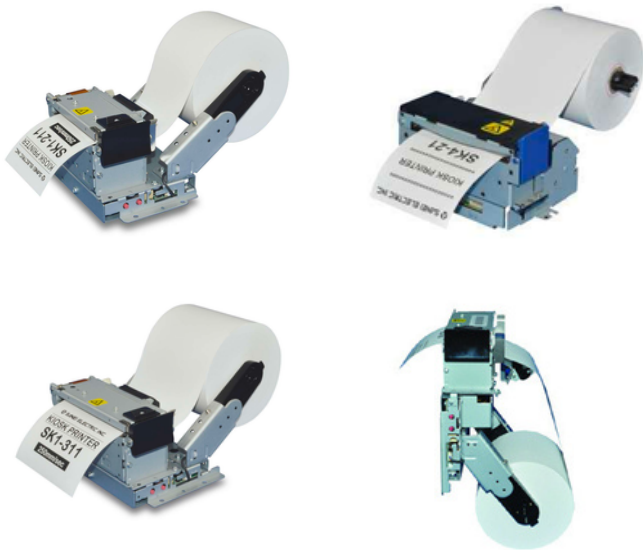

- SDKs and Source code for kiosk builders who prefer to communicate directly with the printer's port for greater status feedback. Contact Star or go to www.starmicronics.com/support.
- Remote firmware updates removing the need for site visits
- Print Verification Status feedback
- Remote communication – with CloudPRNT compatible printers.
- A4-A6 automatic scaling tool for up to 80% savings compared to a typical laser printer on TSP800II

Integration Made Easy

Star's investment, expertise and relationships with industry giants such as Microsoft, Google and Apple ensure developers can integrate Star printers with a consistent experience. Its sophisticated drivers support industry standards from all major operating systems, Star prides itself on the quality of SDKs, source code and Technical Manuals available to developers.

Open Frame Printers

For traditional printing solutions which offer more flexibility in application, Star offers the Sanei open frame range. The Sanei range of barcode, ticket, receipt and label kiosk mechanisms offer fast, high quality 203 dpi printing for slimline kiosks. These printers are compact, with a “fixed” open frame kiosk mechanism and can operate at low temperatures (-20 to +60°C). They feature status / error email capability mitigating the need for regular maintenance to identify errors or down time with the printer.

SK4-21/SK4-31 Series

- Compact and versatile 2" 58mm and 3" 80mm entry level solutions for small space applications
- Max. 150mm/sec print speed
- Max. ϕ 83mm paper roll
- Max. 85 μ m paper
- 3 paper positions
- LED Bezel and Anti-Paper Jam Bezel options available
- Windows Utility drivers with remote status monitor
- Selectable full and partial cut
- Dual serial and USB interface
- Auto-loading function

SK1-211/311 Series

- Compact 2" / 58mm and 3" / 80mm open frame printers
- “Drop-In & Print” paper loading.
- Ideal for thinnest of vertical footprints for the latest generation of slimline kiosks
- Max. 250mm/sec print speed
- Max. ϕ 120mm paper roll as standard. 250mm option
- Max. 150 μ m paper
- Auto-loading function
- Selectable partial or full cut
- Dual Serial and USB interface
- SK1-221 and 321 models feature drop in paper tray
- StarPRNT or ESC/POS with Windows, Linux and Android drivers

SK1-41 Series

- Wide format 4" 112mm open frame kiosk printers
- Max. 150mm/sec print speed
- Max. ϕ 120mm paper roll as standard.
- 250mm roll holder option
- Max. 120 μ m paper
- Easy Paper insert with fully opening cover
- Selectable full or partial cut
- Dual Serial and USB interface

SK1-311SK Linerless Label Kiosk Printer

The new SK1-311SK re-stick liner free kiosk printer is the latest addition to Star’s popular Sanei kiosk printer range. Designed to print repositionable variable length thermal labels, the SK1-311SK eliminates any unused white space on labels which helps paper saving. With its open chassis design, the SK1-311SK is perfect for integration into a variety of kiosk terminals for the food and travel industries or any self-service application. All SK1-311 models come with RS-232C and USB interfaces which integrate with many commonly used kiosk solutions.

Packaged Printers

Star's packaged printers offer ease of installation, a variety of interface options and are CloudPRNT compatible for internet connected services. Ideal for self-service kiosks where staff are physically present to replenish print media.

These printers are also Ideal for tablet kiosk applications, where a lower cost tablet is used for its compact size / slim profile, ease of use and connected services on sites.

TSP700II

- Fast single transaction receipt printer capable of producing barcodes, labels and tickets at 250mm/sec.
- Large paper roll capacity, diameter 100mm (offering up to 60% more paper than a standard 80mm roll)
- Prints on media up to 0.15mm thick
