

Labelling Solutions

Connectivity at every level

Food and Allergy Labelling - Delivery Labelling - Shelf-Edge Labelling - Product Labelling
Healthcare Labelling - Pharmacy labelling - Visitor Management - Inventory Management

Print your way!

Star's range of desktop, portable and kiosk label printers offer a versatile solution for any application. Star's label printers handle precise printing of fixed-length die-cut and variable length linerless labels with high quality text, graphics and barcodes.

Star printers are easy to integrate into existing systems via wired, wireless and cloud connectivity, alongside sophisticated drivers, label software and device management services for a wide selection of operating platforms.

Linerless Technology

A cost effective, paper-saving alternative to traditional die-cut labels, linerless labels have no peelable backing paper and can be printed and cut to any length. Star's label printer range offers options for both permanent linerless labels and repositionable sticky labels.

Printing linerless labels consistently requires advanced printer technology, high-quality components, and specialist linerless media. Renowned for precision manufacturing, Star printers, paired with rigorously tested linerless media, deliver reliable performance day after day.

Please contact Star for more information about Star label printers and approved media.

Food and Delivery Labelling

For food prep labels, delivery labels and QSR food and beverage labels, the mC-Label2, mC-Label3 and the TSP100IVSK offer Star's efficient, high-quality performance. Print customer receipts, food orders, allergy labels and bag seals all from the same printer!

mC-Label2 and mC-Label3

- Compact and versatile direct thermal label printers
- Support strong adhesive and re-stick linerless media, traditional die-cut labels and continuous labels as well as thermal receipt paper - use the same printer for all
- 25mm to 80mm fully adjustable paper widths with simple loading
- Ultra-connected for seamless integration with PC, network, tablet, and cloud-based systems
- Incredibly easy to set up and operate with Star's simple set-up guide

TSP143IVSK

- Compact and economical linerless label printers
- Ideal for repositionable orders and re-stick labels for QSR and food retail / food delivery applications
- Feature internal power supply and a 4-year warranty for long-term dependability

Retail Labelling

With over 40 years' experience of retail POS printing, Star's products are renowned for quality and reliability and are installed in some of the largest retail chains worldwide as well as thousands of independent outlets.

Star's high performance retail label printers offer the same advanced engineering, designed for individual price labels, product information labels, high resolution barcodes and QR codes as well as high quality branding and promotional labels. With versatile connectivity and low maintenance, they are ideal for today's multi-connected retail environments.

Healthcare

Star offers a range of prescription label printing, patient and visitor check-in solutions for pharmacies, hospitals, medical offices, and urgent care centres, streamlining processes and improving patient care.

Star's high resolution mC-Label2, mC-Label3, TSP700II, and TSP800II direct thermal label printers provide clear, accurate prescription labels. Paired with Star's wired or wireless scanners, they simplify prescription management.

Built-in innovation

Not just a label printer! Every Star product reflects four decades of development, experience and refinement engineered into every solution. From hardware innovations such as SteadyLAN Network Tethering and One-Touch-Label to intuitive label design software and cloud enabled device management, you can be sure every Star product meets the demands of today's retail, hospitality and healthcare businesses.

The complete solution

Star's wide range of cloud-connected products and accessories complement its label printer range. From scales to scanners and cash drawers to tablet stands, Star products will work seamlessly together to complete your solution.

Connect from anywhere

Star's commitment to seamless integration for the cloud-connected store continues with Star's next generation CloudPRNT Next technology and Star Micronics Cloud Services. Star's CloudPRNT Next technology is free of charge with its latest receipt and label printers, enabling the printers to print both locally and also directly from web-based apps and online ordering platforms.

Star Micronics Cloud Services is a suite of powerful tools for integrating, monitoring and controlling connected Star devices via the Cloud.

Reliable Cloud Printing

Star's CloudPRNT Next technology allows receipt and label printers to print both locally and from web-based apps and online ordering platforms to improve efficiency in high demand environments

Printer and Device Control

Hosted on Star Micronics' Cloud platform, the StarIO.Online managed service empowers users of cloud-based applications to easily and efficiently control printing and manage devices through our Web API.
